PROPOSED Rough Sleeper Pilot MDT REFERRAL & ACTIVITY REPORTING

1. CGL Outreach identify RS suitable for MDT surgery via agreed criteria (eg non engaging RS with suspected complex needs in need of medical attention for physical / mental health who cannot/ will not engage with statutory services

2. Outreach refers RS to nurse / psychologist by:

a) Taking summary info for referral (see below)
b) Providing info for person to attend drop-in surgery at RTS/ satellite site (giving person leaflet with all necessary details and times) and taking – OR
c) Arrange to meet at the sleep site – may need to do both
d) Completing a short referral including name, tel. no, sleep site, reason for referral

Outreach records incl. client name, sleep site, no. reason for referral on CGL CHRIS system to be made viewable by nurse before surgery if poss/ via referral form

RS attend RTS / satellite surgery / met at sleep site by nurse / psychologist

Nurse/ psychologist attends to immediate health needs and carries out assessment where possible

Option A:

Nurse/ psychologist completes client referral information on casework system/ outcomes form OR sends (via secure email template) to CGL referrer/ caseworker to input on to CHRIS system

Option B:

CGL record outcomes info from email on to CHRIS system to provide one consolidated outcomes report

Providers complete records of activity / outcomes and respond and all sent in separately for consolidation (identify role for this)
